Article Index: 1993-1994

Amplifier Design

Development of a Low Cost, Low Noise GPS Amplifier, Paul J. Schwab and Joan Williamson, February 1993, p. 76.

A Wideband Monolithic, Low-noise, Front-end Amplifier, Scott L. Williams, March 1993, p. 124.

CAD of a Broad-Band Class-C, 65 Watt, UHF Power Amplifier, Robert Baeten, March 1993, p. 132.

Rise Time/Fall Time Enhancement of Class C Bipolar Common Base Transistor Amplifiers, Timothy P. Hulick, June 1993, p. 44.

Transistor Biasing Fundamentals, Gary A. Breed, June 1993, p. 74.

Classes of Power Amplification, Gary A. Breed, August 1993, p. 80.

A Programmable Gain, Constant Phase Shift Amplifier, Thomas McDermott and Roy Keeney, September 1993, p. 76.

RF Power Amplifier Simulation Using SPICE, B.M. Cain, P.A. Goud, and C.G. Englefield, November 1993, p. 35.

Class A Design Techniques Create a New Broadband Amplifier, Charles Gentzler, May 1993, p. 47.

Techniques to Achieve Linear Amplification at HF, Chris Rice, December 1993, p. 46.

An S-Parameter Based Amplifier Design Program, Dale Henkes, December 1993, p. 66.

Programs Help Design Vacuum Tube Amplifier Output Circuits, Thomas A. Crawford, January 1994, p. 62.

Medium Power Bipolar Design Using the NE46134 Nonlinear Model, Lynne Olsen and Brian Kirk, February 1994, p. 24.

Design and Performance of a Low Voltage, Low Noise 900 MHz Amplifier, Ngaraj V. Dixit, March 1994, p. 48.

Program Uses Two-Port Models to Design Small-Signal Amplifiers, Christopher N. Buckingham, March 1994, p. 90.

Design of a Low-Noise Amplifier Using HEMTs, S. Satyanarayana, March 1994, p. 98.

Increasing Linearity in Amplifiers with IF Pre-Distortion, Nick Ierfino, March 1994, p. 127.

Combined Technology Amplifier Design, Stanley Novak, May 1994, p. 34.

Power Amplifier Design Using Quadrature Hybrids, Povl Raskmark, June 1994, p. 70.

Application Circuits for MMIC Amplifiers, Gary A. Breed, June 1994, p. 54.

Designing a Low Cost GPS LNA Using the NE68519, Terry Cummings, June 1994, p. 36.

A High Power, Low Distortion Feed-Forward Amplifier, Walter Koprowski, July 1994, p. 48.

RF FET Amplifier Modules Exhibit a High IP3 Without Feedforward, A.J. Cogan, K. Sooknanan, and L.B. Max, October 1994, p. 67.

Wideband Current-Feedback Op Amps for RF Applications, Michael Steffes, November 1994, p. 62.

Simulating Class C RF Amplifiers, Charles E. Hymowitz and Bill Sands, December 1994, p. 49.

Antennas and Propagation

Microstrip Antenna Modeling, Andre Boulouard, Michel Le Rouzic and Jean Paul Castelletto, January 1993, p. 44.

Limits of Range Calculations, Bernard Kasmir, August 1993, p. 45.

Solar Source Antenna Gain Degradation Measurements, Glenn W. Hurley, January 1994, p. 34.

Multi-Frequency Antenna Technique uses Closely-Coupled Resonators, Gary A. Breed, November 1994, p. 78.

Book Reviews

Radio Frequency Transistors, Norm Dye and Helge Granberg, Butterworth-Heinemann, June 1993, p. 93.

Phase Locked Loops: Theory, Design, and Applications, 2nd Edition, Roland E. Best, McGraw-Hill, June 1993, p. 93.

Array Signal Processing, Don H. Johnson and Dan E. Dudgeon, PTR Prentice-Hall, June 1993, p. 93.

Circuit Analysis

A Clearer Derivation of the Microwave Gain Equations, Dean A. Frickey, February 1993, p. 48.

An Introduction to Noise Figure, Jonathan Bird, March 1993, p. 78.

A Nodal Network Analysis Program, John A. Eisenberg, March 1993, p. 89.

Log Mac: Frequency and Time Domain Analysis, Jeff Crawford, March 1993, p. 107.

A Basic Review of Feedback, Gary A. Breed, April 1993, p. 62.

A Resistive Attenuator Calculation Program, Jouni Verronen, April 1993, p. 70.

A Comparison of Simple Software Methods for RF Calculations, Andrzej Przedpelski, May 1993, p. 61.

A Program for Impedance Format Conversion, Thomas Bavis, May 1993, p. 70.

Program Performs Symbolic Circuit Analysis, Henry Yiu, August 1993, p. 84.

Introduction to S-Parameters, Theodore Grosch, September 1993, p. 64.

Double Feedback Circuit Analysis, Frank Egenstafer, January 1994, p. 66.

Utility Programs Simplify RF Analysis in SPICE, David K. Lovelace, September 1994, p. 81.

Components

RF Component Modeling for CAD/CAE, Les Besser, July 1993, p. 64.

Designing with Ultraminiature SMT Semiconductor Packages, Terry Cummings and Paul Edwards, October 1993, p. 44.

Merging RF and IC Design Tools for ASIC Development, Mojy C. Chian and Deborah A. Chian, October 1993, p. 52.

Obtaining DMOS Power RF Transistor Information from Published Data Sheets, S.K. Leong, November 1993, p. 26.

Silicon FETs Enter L-Band Power Applications, Adrian I. Cogan, Frank Sulak, Ken Sooknanan, Neill Thornton, Toru Nakamura, November 1993, p. 40.

Chip Set Addresses North American Digital Cellular Market, Michael M. Sera. March 1994, p. 54.

New RF ICs and Modules Boost Market Development, April 1994, p. 34.

Filter Design

Lowpass Coaxial Filters Synthesized by COAXLPF, Eric L. Stasik, February 1993, p. 60.

An Introduction to RF/Microwave Filter Design, David R. Loker, March 1993, p. 31.

An RF Swept Filter for Medical Ultrasound Systems, Alexander Pummer, April 1993, p. 65.

High Dynamic Range Tunable Bandpass Filters for Communications, Richard Markell, May 1993, p. 79.

Improved Design Equations for Part 15/ISM Microstrip Bandpass Filters, Theodore S. Rappaport and Alan S. Fox, August 1993, p. 33.

Computer Design of Equal Shunt Value Tubular Bandpass Filters, Albert J. Klappenberger, March 1994, p. 114.

A Program for the Design of Chebyshev Impedance-Transforming Lowpass Filters, Ljubomir Urshev and Antoaneta

Filter Design

Lowpass Coaxial Filters Synthesized by COAXLPF, Eric L. Stasik, February 1993, p. 60.

An Introduction to RF/Microwave Filter Design, David R. Loker, March 1993, p. 31.

An RF Swept Filter for Medical Ultrasound Systems, Alexander Pummer, April 1993, p. 65.

High Dynamic Range Tunable Bandpass Filters for Communications, Richard Markell, May 1993, p. 79.

Improved Design Equations for Part 15/ISM Microstrip Bandpass Filters, Theodore S. Rappaport and Alan S. Fox, August 1993, p. 33.

Computer Design of Equal Shunt Value Tubular Bandpass Filters, Albert J. Klappenberger, March 1994, p. 114.

A Program for the Design of Chebyshev Impedance-Transforming Lowpass Filters, Ljubomir Urshev and Antoaneta

Stoeva, May 1994, p. 76.
Using Design of Experiments to Optimize Filter Tuning, Dan Pleasant, June 1994, p. 58.
A Design Method for Unequally Terminated Elliptic Filters, Michael G. Ellis, Ph.D., September 1994, p. 78.
Designing Accurate Small Inductors for Microwave L-C Filters, Albert Klappenberger, November 1994, p. 52.
Ladder Filter Design Made Simple, Richard Yeager, December 1994, p. 80.

Frequency Synthesis
A Flexible Fractional-N Frequency Synthesizer for Digital RF Communications, Jonathan Stilwell, February 1993, p. 39.
A Low Sideband-Jitter Phase Lock Loop, Rand H. Hulsing II, February 1993, p. 25.
Synthesizer Design With Detailed Noise Analysis, Terrence F. Hock, July 1993, p. 37.
Using Aliased-Imaging Techniques to Generate RF Signals, Allen Hill and Jim Surber, September 1993, p. 31.
Linear Frequency Modulation – Theory and Practice, Bar-Giora Goldberg, September 1993, p. 39.
Frequency Independent Phase Tracking System Creates a True Phase Locked Loop, Glen A. Myers, January 1994, p. 73.
Phase-Locked Loop Parameters and Filters, Jack Porter, June 1994, p. 66.
Spurious Audio Modulation of VCOs Through RF Coupling, William F. Egan and Roger A. Lucas, November 1994, p. 97.

General Purpose Software
New User Interface Makes RF CAD EASi, Raymond S. Pengelly, March 1993, p. 57.
Software for Lumped Element Design, M. Saroja, February 1994, p. 60.
RF Amplifier and Oscillator Design Using the UCFCAD Tools, Michel Rohery, Sam Richie, and Madjid Belkerdid, May 1994, p. 78.
High Speed Analog and Digital Circuits
Switching Speed: Definition and Measurement, Ra'anan Sover, January 1993, p. 58.
A Low Cost, Fast RF Switch, Ronald "Sam" Zborowski, February 1993, p. 64.
Use Emitter Coupled Logic in Your RF Applications, R.N. Mutagi, April 1994, p. 26.
Digital IF Processing, Clay Olmstead and Mike Peterowski, September 1994, p. 30.
Ultra Wide Band Analog Signal Processor Products, William W. Cheng, September 1994, p. 42.

High Speed Analog & Digital Circuits
Switching Speed: Definition and Measurement, Ra'anan Sover, January 1993, p. 58.
A Low Cost, Fast RF Switch, Ronald "Sam" Zborowski, February 1993, p. 64.
Use Emitter Coupled Logic in Your RF Applications, R.N. Mutagi, April 1994, p. 26.
Digital IF Processing, Clay Olmstead and Mike Peterowski, September 1994, p. 30.
Ultra Wide Band Analog Signal Processor Products, William W. Cheng, September 1994, p. 42.
Notes on High-Speed Digital Signals, Gary A. Breed, December 1994, p. 70.

Industry Insight
Test Equipment Trends – Processing Power and Automation, Gary A. Breed, January 1993, p. 22.
A Historical Look at RF Modulation Methods, Gary A. Breed, February 1993, p. 22.
Where Does HDTV/ATV Stand?, Gary A. Breed, March 1993, p. 26.
The Technology of Personal Communications, Gary A. Breed, April 1993, p. 26.
Cellular Systems – Reaching Out With RF, Gary A. Breed, May 1993, p. 32.
Military RF Systems – Selecting the Right Targets, Gary A. Breed, June 1993, p. 30.
A Diverse Market for RF Amplifiers, Gary A. Breed, July 1993, p. 28.
New Services Overhead, Andy Kellett, August 1993, p. 30.
Update on Regulatory Activity, Gary A. Breed, September 1993, p. 28.
Surface-Mount Technology Reaches 'Standard' Status, Gary A. Breed, October 1993, p. 32.
High Expectations Drive Industry Efforts for Consumer Markets, Gary A. Breed, November 1993, p. 24.
RF Fires Industry's New Foundries, Andy Kellett, December 1993, p. 22.
Why DSP Could Be the Key to Your Next RF Design, Andy Kellett, January 1994, p. 22.
Fast Si, New Design Tools and Portability Demands Bring ASICs to RF, Andy Kellett, February 1994, p. 22.
High Volumes, Accurate Designs Obtained with Advanced Test, Andy Kellett, March 1994, p. 28.
Dealing with Signal Degradation, Andy Kellett, April 1994, p. 22.
Miniaturization: Getting More for Less, Andy Kellett, May 1994, p. 32.
RF Radiation Hazards, Andy Kellett, June 1994, p. 24.
Antenna Technology Takes on the Challenge of Wireless Applications, Gary A. Breed, July 1994, p. 24.
RF Issues Help Fill FCC Dockets, Andy Kellett, August 1994, p. 26.
Government and Industry Labs Advance RF Metrology, Andy Kellett, September 1994, p. 28.
Finding Marketshare Offshore, Andy Kellett, October 1994, p. 25.
RF at Home on Cable, Andy Kellett, November 1994, p. 28.
RF Distributors and Reps–Expertise is Part of the Bargain, Andy Kellett, December 1994, p. 24.

Integrated Circuits - General
Radios for the Future: Designing for DECT, Benny Madsen and Daniel E. Fague, April 1993, p. 48.
RFIC Chip Set Targets 900 MHz Transceivers, Jeff Ortiz, Sheryl Zavion and Paul Holmes, August 1993, p. 60.
Transceiver "Chip Simplifies GSM Cellular Design, Reynolds E. Jenkins, June 1994, p. 26.
BiCMOS Process Offers Power, Performance and Cost Advantages, Michael M. Sera and Bill Mack, August 1994, p. 30.

Manufacturing Techniques
Manufacturing Considerations for the Design of RF Products, Robert L. Barron and William J. Choe, October 1993, p. 65.
Printed Circuit Board Considerations for Low Cost Design, Gary A. Breed, September 1994, p. 62.

Miscellaneous Articles
RF Expo West Technical Program Abstracts, February 1993, p. 71.
New Products Showing at RF Expo West, March 1993, p. 142.
A Generic GPIB/RS-232 Controller, Kevin Cordle, June 1993, p. 77.
An Isolation Probe for Oscilloscopes, Eugene E. Mayle, June 1993, p. 79.
A 25 Mbps Differential Receiver with 1000 Volts of Isolation, Pavlo Bobrek, August 1993, p. 90.
Tampa Conference Features Special Track on Space Applications, October 1993, p. 39.
Notes on Power Supply Coupling, Gary A. Breed, October 1993, p. 85.
New Products at RF Expo East, October 1993, p. 115.
Contest Winners Demonstrate Innovation and Hard Work, July 1993, p. 49.
RF Expo West Program and Short Courses Schedule, February 1994, p. 67.
Products on Display at RF Expo West, March 1994, p. 122.
RF Design Wraps Up a 15-Year Anniver-

sary Celebration, October 1994, p. 27.
Orlando Show Features Timely Presentations, New RF Products, November 1994, p. 71.

Mixers, Multipliers and Dividers

A Logic-Compatible Mixer, Thomas P. Hack, January 1993, p. 68.
Frequency Translation of a Baseband Signal, Eric A. Adler, Edward A. Viveiros and John T. Clark, April 1993, p. 41.
The Diode-Ring Mixer, Steve Maas, November 1993, p. 54.
Program Analyzes Mixer Spurious Products, Richard Yeager, November 1993, p. 64.
Designing Punch-Through Varactor Diode Frequency Multipliers, Paul H. Williams, November 1994, p. 86.

Modulation/Demodulation

A Narrow Band FM Discriminator, George Kassabian, March 1993, p. 84.
Educational Project for Electronic Engineering Students, Yvon Roy, March 1993, p. 92.
Continuously Variable Bandwidth Feedback Demodulator for Home FM Stereo Reception, Jerry Pulice, May 1993, p. 72.
Simulating a QPSK Modem, Don Miller, February 1994, p. 34.
A first Introduction to ""Direct Sequence Spread Spectrum, Gary A. Breed, April 1994, p. 48.
A First Introduction to Frequency Hopping Spread Spectrum, Gary A. Breed, May 1994, p. 64.
Class-S High-Efficiency Amplitude Modulator, Frederick H. Raab Ph.D. and Daniel J. Rupp, May 1994, p. 70.
Open Loop Modulation of VCOs for Cordless Telecommunications, Daniel E. Fague, July 1994, p. 26.
A Fast Envelope Detector, Dominic J. Ciardullo, July 1994, p. 34.
An AM Detector Compatible with SSB-SC, Chase P. Hearn, July 1994, p. 44.
A Direct Quadrature Modulator IC for 0.9 to 2.5 GHz Wireless Systems, William H. Pratt, August 1994, p. 54.
An Analog Phase/Frequency Comparatpr and BPSK Carrier Demodulator, Richard W.D. Booth, November 1994, p. 32.

Oscillator Design

New Oscillators Advance the Art of Low Noise Performance, Charles Wenzel, January 1993, p. 51.
1.8 GHz Direct Frequency VCO With CAD Assessment, Brendan Kelly, Dr. Noel Evans, Brian Burns, February 1993, p. 29.
Program Aids Series-Feedback Transistor Oscillator Design, Theodore Grosch, March 1993, p. 98.
Cross-Correlation Phase Noise Measurements, Warren F. Walls, March 1993, p. 121.
Simple, Low-Cost UHF VTOs, Andrzej Przedpelski, May 1993, p. 35.
Eliminating Spurious Responses in Phase Noise Measurements, Bruce Long, May 1993, p. 41.
New VCO Family is Created from Theory and Modeling, Michael S. Vogas, June 1993, p. 54.
Balanced Meissner Oscillator Circuits, Nick Demma, December 1993, p. 72.

Phase Shifters/Matching Networks

MIMP Analyzes Impedance Matching Networks, Dan Moline, January 1993, p. 30.
The Design of Constant Phase Difference Networks, Robert J. Dehoney, January 1993, p. 65.
A High Accuracy Phase Shifter Based On A Vector Modulator, Dominic J. Ciardullo, October 1993, p. 106.
NPOLE Helps Design Phase-Shift Networks, R. Dehoney, April 1994, p. 52.
A New CAD Method for Narrowband Matching Circuits, Mihai Albulet, May 1994, p. 52.
Broadband Impedance Matching Methods, Thomas R. Cuthbert, Jr. Ph.D., August 1994, p. 64.
Broadband Impedance Matching-Fast and Simple, Thomas R. Cuthbert, Jr., Ph. D., November 1994, p. 38.

Product Forum

Crystal Filters, July 1994, p. 61.
Spectrum Analyzers Gain Flexibility, August 1994, p. 77.
Custom ICs and ASICs Provide Wireless Design Solutions, September 1994, p. 88.
RFICs Exploding in Marketplace, October 1994, p. 74.
PC Based Instruments Gaining Ground, November 1994, p. 102.
Frequency Synthesizers Moving Up in the Wireless Marketplace, December 1994, p. 84.

Product Report

Mixers: An RF Balancing Act, Andy Kellett, January 1993, p. 74.
Software Revs Up the RF Design Cycle, Andy Kellett, February 1993, p. 84.
Inductors and Capacitors: L and C for Changing Markets, Andy Kellett, March 1993, p. 147.
Tallying Up Counters, Andy Kellett, April 1993, p. 76.
Signal and Sweep Generators Re-Aimed at Commercial Market, Andy Kellett, May 1993, p. 86.
Video Op Amps: A Pretty Picture, Andy Kellett, June 1993, p. 95.
Data Converters Meet RF Needs Bit by Bit, Andy Kellett, July 1993, p. 72.
The Oscillator Business is Humming, Gary A. Breed, August 1993, p. 94.
Manufacturability Shapes Boards and Substrates, Andy Kellett, September 1993, p. 84.
Subtle Changes for RF Brawn, Andy Kellett, October 1993, p. 117.
EMC – Susceptibility Takes on New Importance, Andy Kellett, November 1993, p. 58.
The Search for Smaller, Cheaper Components, Gary A. Breed, December 1993, p. 71.
Power Transistor Manufacturers Aim for New Markets, Gary A. Breed, January 1994, p. 77.
The RF Coupler: A 20th Century Workhorse, Ann Marie Trudeau, February 1994, p. 69.
Coaxial Cable Industry Copes with Changes, Ann Marie Trudeau, March 1994, p. 129.
Shielding Products Makers Wait for Electronics Industry to Focus, Ann Marie Trudeau, April 1994, p. 58.
Communications Test Equipment Copes with Myriad of Standards, Ann Marie Trudeau, May 1994, p. 85.
RF CAD/CAE Companies Try a Variety of Approaches, Ann Marie Trudeau, June 1994, p. 76.

RF Systems

A Robust Signaling Technique for Part 15 RF Control Network Applications, Greg Magin, April 1993, p. 29.
A Low Power RF ID Transponder, Raymond Page, July 1993, p. 31.
Program Calculates ECM System Performance, Ronald G. Day, October 1993, p. 94.
Program Calculates Cascaded System Parameters, Raymond P. Meixner, August 1994, p. 72.
A Low Cost Doppler Detector, Milton Luiz Gomez and Adirson Mauro da Silva, Jr., December 1994, p. 26.

Test and Measurement

Antenna and Processor Techniques for Detection of Manmade RF Noise, F.N. Eddy, March 1993, p. 111.
Noise Generators Find Key Uses in VXI Based Systems, Edward J. Garcia, May 1993, p. 81.
Combless Generator Tests Radar Warning Receivers, H. Paul Shuch, October 1993, p. 89.
Spectrum Analyzer-Based System Simplifies Noise Figure Measurement, Carla Slater, December 1993, p. 24.
Single Tone Intermodulation Testing,

Steve Winder, December 1993, p. 34.
Multipath Fading Emulation for Wireless Communications, Bent Hessen-Schmidt, January 1994, p. 42.
The Flux-Gate Magnetometer: A Very Sensitive ELF Magnetic Detector, Peter Vizmuller, January 1994, p. 24.
Using RF Channel Simulators to Test New Wireless Designs, Karl Fielhauer, January 1994, p. 56.
Portable Network Analyzers Troubleshoot Wireless Systems, Ken Harvey, April 1994, p. 38.
Novel Design for RF Power Meter, Larry Candell and Jeff Shultz, August 1994, p. 78.
Quick Measurement of Unloaded Q Using a Network Analyzer, Ajay Asija and Ananad Gundavajhala, October 1994, p. 48.
Dual Resonance Measurements Evaluate Unknown Coils, John Dunn, October 1994, p. 54.
Improve Measurement Accuracy With Bandwidth Related Factors in Spectrum Analysis, Morris Engelson, October 1994, p. 62.
CAE Modeling of a Broadband Magnetic Field Sensor, Greg B. Gajda, Art Thansandote, and Dave W. Lecuyer, November 1994, p. 90.

Transmission Lines/Couplers

Simulating Lossy Transmission Lines with PSpice, Walter Banzhaf, January 1993, p. 25.
A Tiny Electromagnetics Simulator, Jonathon Y.C. Cheah, September 1993, p. 70.
A Coupled Microstrip Line Review and Design Program, Brian Brewster, December 1993, p. 58.
Broadband Transmission Line Transformer Family Matches a Wide Range of Impedances, Donald A. McClure, February 1994, p. 62.
A Transformed Feedback Attenuator, Carl Zatl, March 1994, p. 94.
Simulating Coupled Transmission Lines with Super-Spice, Krishnamoorthy Kottapalli, May 1994, p. 42.
Transmission Line Fundamentals, Andy Kellett, July 1994, p. 56.

Transmitters/Receivers

The Mechanical Filter in HF Receiver Design, William E. Sabin, March 1993, p. 43.
Implementation of a C-QUAM AM-Stereo Receiver Using a General-Purpose DSP Device, Dion Messer Funderburk and Sangil Park, June 1993, p. 32.
Broadcast Radio Uses Home-Made Components, Jim Escoffier, June 1993, p. 84.
A Program for Design and Analysis of Receivers, John Donohue, October 1993, p. 101.
Receiver Basics–Part 1: Performance Parameters, Gary A. Breed, February 1994, p. 48.
Receiver Basics–Part 2: Fundamental Receiver Architectures, Gary A. Breed, March 1994, p. 84.
An Algorithm For Combined Receiver Sample Timing and Frequency Offset Estimation, K. Anvari, March 1994, p. 30.
RF Receiver For a Bistatic Radar, Ramir De Porrata-Doria i Yague, Antoni Elias Fuste and Javier Fernandez de Muniain, March 1994, p. 106.
New UHF Receiver Architecture Achieves High Sensitivity and Very Low Power Consumption, Darrell L. Ash, December 1994, p. 32.

We design and manufacture systems, equipments, and ASICs for digital data transmission

Channel coding
Viterbi, Reed-Solomon, Turbo-codes,...

Coded modulations
TCM, BCM,...

Digital demodulation
n-PSK and n-QAM digital modems, equalizers,...

Direct sequence spread spectrum
digital matched filters, modems,...

Multicarriers
OFDM,...
